So even though Apple seemed to be moving in a more repair-friendly direction by letting independent repair shops buy genuine parts, the terms required to actually get those parts suggest that Apple's stance toward third-party repairs hasn't really changed all that much.. Apple claims, "Only technicians who have completed Apple service training and who use Apple genuine parts and tools should replace iPhone displays." The company also warns that third-party repairs may not follow proper procedure and could result in damage to the phone's battery, cause overheating or even result in In an apparent policy shift, Apple recently notified store technicians that third-party iPhone screen repairs no longer void the handset's standard Method 1: Factory Reset iPad without Password with Any iOS System Repair Any ... a forgotten Apple ID or password, you can turn to iOS Data Backup & Restore to ... of losing data with a professional third-party program - iOS System Recovery. ...
