CaptureIt Plus Crack Free Download

CaptureIt Plus is a small software application which helps people take screenshots of their desktop, save them as PNG, JPG, BMP, TIFF, GIF and WMF files, edit them or share them on various social network platforms, such as Facebook, Imgur and Twitter. The UI is non-obtrusive, as it goes in the system tray from the first launch. Aside from that, it can be used with great ease by all types of people, be they experienced or not with computers. This program enables you to take snapshots in a lot of different ways. To be more accurate, you can choose to capture only the active window or a specified one, the entire screen or a fixed region. It is also possible to repeat the last capture, as well as take scheduled pictures, and use different shapes, such as circles, rectangles and even freeforms. After you have taken the capture, it is possible to e-mail it to friends (if you have a mail client), share it on Facebook, Twitter or Imgur, send it to SkyDrive or print it. Plus, you can also convert it to grayscale, copy it to the Clipboard, view it in your default editor, add a watermark or open it in the integrated "ScreenShot Editor". The latter enables you to add text (with custom font type, size and color), use a pen (adjustable color and size), highlighter or eraser. This utility lets you to also access a color picker and a GIF builder. From the settings panel you can choose the output folder, filename and image format, set up keyboard shortcuts, and execute a certain action once the screenshot has been taken. Taking all of this into consideration, we can safely say CaptureIt Plus is an efficient tool, with many option to take advantage of, a user-friendly interface, good response time and an array of customizable preferences.
