Journey Map

There were many ways we could have done the map, but the one thing we needed it to do was show that the places you go to in the game are part of a bigger world.

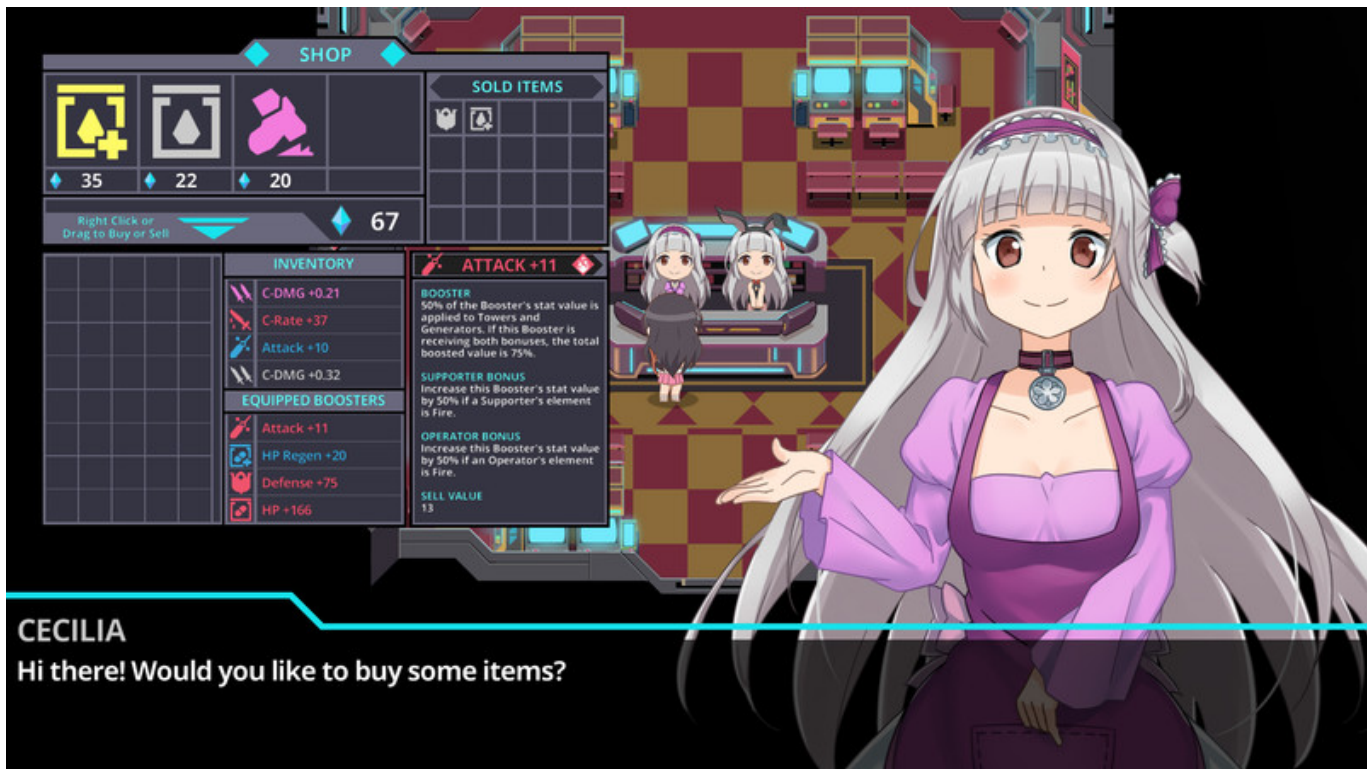

We briefly played around with the idea of having more than one map - two or even three at different scales - with the most expansive one showing how insignificant the kingdom of Avestan is.

In the end we decided that this size would give the player a good sense of where events take place relative to each other. The signs that point off to other parts of the world serve to show that the area covered by the map is only a small part of the greater world.

The map is not completely realistic, to scale or topographical. It's a bit of a mishmash with plenty of artistic licence taken. We liked to think of the map as being a parchment that Tahira carries with her. It may have been made by an Avestan artisan. It was a tricky balancing act for me. When I looked at reference images of medieval maps, most of them are terrible with an awful sense of perspective. While I wanted it to be convincing I didn't want it to be so bad that it was jarring for the player. The result is a map which might pass as old-fashioned and inaccurate while still giving some sense of the relative distances between the various locations.

Very fun game, though not very idle. (Very limited time your character can do anything without you there) The character, loot, areas, bosses are nicely made, and there is even some decent music in there!. It's a really fun game, with hordes of zombies to kill and a very talented humour. And as far as I know, there's only one guy behind the development so it's an incredible challenge to create such a good game with very few resources: well done lonely developer!!!! I'm willing to complete the poor Jack's story. It's absolutely worth the price.. Finally i have a good football game on my linux. :D Really fun. :D. It's so good to be back to the franchise of my childhood. 10/10 for the nostalgia trip and 9/10 if it's your first encounter with this saga.. First and second level were decent but factory level was nothing but enemy spam down a close quarters corridor. my gun stopped shooting while i was still alive and enemies spawn way too close. second or third round of enemies spawn while youre still trying to get rid of the first round of enemies down a completely different angle. i feel like there was no level design in the factory mission, it was just an obnoxious amount of enemies and blood covering my entire screen so i couldn't tell what was going on. it was too hard to aim for headshots. shotgun pops up out of nowhere and when i ran out of ammo my assault rifle didn't come back. Please construct actual level design and appropriate pacing, lower the gore effects, and fix the bugs with the gun switching/shooting if you want this game to sell.. gets frustrating after a while. often you get "bosses" what just means you have to fight 2 opponents in a row but you only get 1 health bar been stuck on the 10th boss for 3 days now
0% skill and 100% luck, you only get stronger if you buy heroes with real money
would like this game more if there was some skill involved. This game is AWESOME!. It's really fun and worth for it's price. But it's very VERY buggy and there are ALOT OF game breaking glitches. Is it worth buying it if it's even worth more ? Only then if bugs are fixed. I got helped with my problem.

last level проходил 10 минут, и ещё парочку. В начале изи было, в с 50-тых уже тяжело =)

Nice game) 10/10. Beautiful game, really nice art & great aesthetics.

Can't understand chinese tho, would love english translation, even broken english would be greatly appreciated!. If you loved the boys, you will love this Drama CD just as much.

The VAs did such a great job, I fell in love with the boys all over again. Now I carry them along on my MP3 all the time.

There were also interviews of the VAs and some Bloopers, which made me laugh very hard.

The price seems more than fair for me, too, considering the first VN is free!. The game pretty good for an open source game. It's free, it's stable and looks fine since it's free so it's better not to make high expectations. If you are looking for a truly free multiplayer shooting game then I say go for it. Ask your miser friends to download it and whenever you feel like playing it. Go ahead and play. Pretty good for a free to play game.. A fairly decent puzzle game where the task is to get one or more scarab beetles to the finish square based on a fixed set of rules when they meet an obstacle (red beetles turn left, green beetles turn right), with more rules being added as you progress through the levels (gates, rotating tiles, one use squares, balls that can be pushed to holes, etc.)

On the whole most of the levels are fairly easy to complete, although getting 3 falcons can sometimes take a bit more thought and timing, as one way of reducing the moves needed on some levels is to time two beetles to arrive in adjacent squares rather than manually pausing one in the right spot and starting it again when the other arrives.

There were only two levels I genuinely found more complicated and required quite a few attempts to work out the correct path (plus one where I made an incorrect assumption and thought it was much more complicated than it was), so it isn't going to stretch you too much to complete.

Overall then a pretty decent puzzle game that is a little bit unique, and good for a couple of evenings head scratching.. Either the point and click do not work properly for movement and scene change or the voice responses to same are so unintelligent that it makes it appear to be a broken or buggy game !

I like adventure games , but this game got just about the poorest point and click control for movement and especially scene change that I have ever tried. If the developer would make the point and click work better for movement and especially scene change (like enter buildings) or make responses to point and click more intelligent then maybe I could play the game but as it is then no! , just plain NO !. A GTX 1050 4GB i5

runs really good. If you tired of collecting money in game for buying some ship, this dlc might help you.. also buy when this dlc is -50% off. it's great!. OMG I just finished playing this game and I LOVE IT!! Bura-chan has been a long time acquaintance of mine and I adore her to pieces! I couldn't wait for her game to come out when I saw it many years ago on Tumblr! I'm so proud of my friend for getting this far, for creating such a spectacular game and for achieving such great success. The game play is wonderful, the story line is flawless and I enjoy the pace of the game. I love the art style so much and the way the cut scenes are portrayed. It's like a combination of a FPS game, an otome game and a JRPG all in one. This is just lovely and so much fun. I highly recommend it to any who loves JRPG games, story rich games, thrillers, psychological games or military themed shooter games.

**Side note, my only complaint is the characters move slowly. xD; I wish they could run a bit faster. But this is more a preference, it doesn't affect the gameplay it's just I am not a patient person. Haha! XD **
